

MARQUEE®

USING BEHR MARQUEE

Main Points

- Surfaces must be previously painted
- Select MARQUEE Interior Paint & Primer
- Tint the base (ULTRA PURE WHITE®, medium or deep) with an exclusive Marquee color
- Note: ULTRA PURE WHITE must be tinted with a color for the one-coat coverage
- Use quality rollers and brushes
- Work in small 3' x 3' sections
- Heavily saturate the roller
- If you hear a sticking sound while painting - reload the roller
- Don't spread the paint too thin - let the thicker coat provide the coverage
- Make sure the 3' x 3' section is completely covered before beginning a new section
- Maintain a wet edge for an even finish
